

Wilbur Davis Studios

1- Start by assembling the basic frame. We've found its easiest to do this upside down.

2 - Pin each joint by screwing in the corner legs tightly. If assembling the frame upside down, flip the frame over after you do this. 2 people are needed to flip the bed frame.

3 - (Queen and King Beds Only) Attach the center leg with included bolt and then lower midbeam into place. Midbeam ends are marked for best fit, so match up the letters as labeled.

4 - Insert slats Into slat pockets.
